

Ian Hovde

Software Engineer

ianhovde@gmail.com — Boston, MA — linkedin.com/in/ianhovde

Summary

Experienced software engineer with a proven track record in backend development, API design, and database management. Adept at leading complex migrations, optimizing systems for efficiency, and driving the adoption of modern development practices. Strong mentorship skills, fostering a collaborative and productive team atmosphere through clear communication and hands-on guidance. Passionate about delivering high-quality solutions that align with business objectives and exceed user expectations.

Experience

SharpenCX

06/2024-Present

Software Engineer Team Lead

- Led the migration and upgrade of a multi-million dollar application stack with 70+ applications, transitioning from on-premises data centers to multiple AWS regions
- Utilized Docker, Bitbucket Pipelines, and AWS CDK to establish a PCI-compliant and fully redundant environment, ensuring scalability and reliability
- Managed a team of 5 engineers across 3 product stacks, facilitating standups, bi-weekly one-on-ones, and performance reviews to drive team alignment and individual growth.
- Reviewed and approved pull requests to ensure high code quality and compliance with security standards, safeguarding sensitive data including PCI and HIPAA information.

SharpenCX

10/2023-05/2024

Software Engineer II

- Implemented company-wide adoption of CI/CD pipelines using Bitbucket Pipelines.
- Aided in backend development for a new customer facing product (ExpressJS, TypeScript), advancing it from Beta to GA.
- Managed and executed all legacy production releases, ensuring stability and adherence to test plans.
- Evaluated incoming Jira tickets to assess priority and provide time estimates for completion.

Plum Voice

03/2023-09/2023

Senior Software Engineer

- Primary engineer on core web and voice processing application, utilized by the entire customer base, handling up to 10,000 concurrent connections during peak traffic (PHP/JS).
- Shipped 20+ releases on a weekly cadence, enhancing customers' web and voice experience with minimal service disruption.
- Contributed to AI product development on a modern stack (Python FastAPI).
- Coordinated and ran code review meeting among team members to ensure company and data security best practices were being met in a relaxed collaborative environment.

Plum Voice

09/2021-02/2023

Software Engineer

- Engineered multiple features for core voice application, integrating live with AWS DynamoDB, AWS S3, AWS Polly, and Google Dialogflow (PHP).
- Redesigned and optimized logs database with PostgreSQL, enhancing capacity and query speed.
- Contributed to core application upgrade from PHP5.3 to PHP7.
- Supervised and mentored interns, assigning daily tasks, fostering problem-solving skills, conducting performance reviews, and providing ongoing support.

Plum Voice

09/2020-08/2021

Junior Software Engineer

- Designed and coded RESTful API endpoints, enhancing customer control and accelerating information retrieval for applications.
- Architected and developed custom PHP voice applications per customer specifications.
- Provided Tier 3 support for main product stack, including on-call responsibilities.

Skills

Languages: JavaScript (NodeJS, ExpressJS, Bun, VueJS), Python (FastAPI, Flask), PHP (Laravel, Koseven)

Databases: SQL (MySQL, Postgres), NoSQL (DynamoDB, MongoDB, CouchDB)

Tools: IaC (AWS CDK), CI/CD (CircleCI, Bitbucket Pipelines, Github Actions), RabbitMQ, Redis, Docker, Git

Education

09/2016-08/2020

Wentworth Institute of Technology — BA: Computer Engineering
Magna Cum Laude
